

**FUCK MAY 68**  
**FIGHT NOW**

# **MARCH ON THE G20 - SEPTEMBER 24th**

**The destructive policies of the G20 have brought us nothing but crisis after crisis. As the governments of the world have embraced capitalism, we have watched the forests disappear, seen the conflicts of the world intensify, and find it harder and harder to afford even the most basic living expenses as the rich collect their profits. When will we decide that an essential line has been crossed? When will our disgust turn into action? This September 24th, we will meet in the streets to both find each other as comrades and fight the systems which threaten to destroy everything we hold close.**
