L he anti-police resistance movement brewing for more than a year is gearing up for a third 2011 demonstration. Aiming to mark the International Day Against Police Brutality (renamed by local organizers as the International Day Against Police Terror), October 22nd is set to be the sixth round of street protests in a year. Last year's O22 protests were particularly eventful, seeing Denver take the streets without a permit for just the second time since the 2008 Democratic National Convention. During the march, a police car was attacked and the cops didn't dare attempt to attack the angry, largely working-class or houseless crowd. There were no arrests. Since then, several more protests have ended ... of police firings briefly created

## AMELIA:

executed while sitting in his truck in an industrial park in Aurora. It was time for the movedowntown corridor, erecting street barricades, shutting down traffic, and redecorating the city.

A short scuffle occurred when police refused to allow the crowd back into the Santa Fe District, and the march attempted to disperse a short while later. Within the dispersal, a small firework went off, and the police chased a young woman, later to be identified as Amelia Nicol, down a nearby alley where she would be assaulted and arrested.

Amelia's arrest and the subsequent charges illustrated an effort on the part of local police to attack the militant elements of the growing with minor offenses. One, a minor, had anti-police terror movement. Amelia would become a symbol. To the police, she would in days. Two still face charges, but will symbolize what would happen to those who resisted their reign of terror. To the militants, she ate with the state and accept any plea deal. would symbolize the very nature of the struggle they were engaged in. This was war. The police were treating it as such. It was far past time for those on the other side to treat it the same way.

The Denver Anarchist Black Cross, a local support, sprang into action to work to defend delivered to the Assistant District Attorney.

dismissed the most serious of the charges during a preliminary hearing on June 9th. Sev-Amelia, and she was out amongst comrades. She was given a place to live, a job, clothing, and as much support as the local movement could muster as she and Denver ABC dug in for what was expected to be a long and drawn out legal battle. Amelia had already spent more time in jail than any of any local law enforcement agency who had been implicated in prison to having every single charge against her too have made it clear that violent attacks against community members. A short street brawl eruptthey will back down." and then proceeded to march through the ed. When it was over, several police officers had bloodied faces, and three comrades were in custody. It cannot be stressed enough that many more would have been arrested if comrades hadn't fought back and forced the unarrest of several participants. The march then continued to the rally, unimpeded after the scuffle. Obviously, the police had upped the ante yet again. The arrest and subsequent charging of Amelia had not done enough to cow the movement into inaction. They would need to continue to escalate their tactics against the militants. However, all of the arrestees were charged their charges completely deferred withgo to trial in October, unwilling to negoti-It was this same attitude that was present on September 14th when Amelia was offered a last minute plea deal from the District Attorney. 022: the people will fight back in a literal, and not just figurative sense, then

Due to the extraordinary loss in court by the city and police department in the case of Amelia Nicol, this year's O22 demonstration is shaping up to be very interesting. The police, thus far, has been unable to prosecute anyone they have arrested at recent anti-police protests. This is largely because of most defendants' stance on refusing to negotiate with the State. Mass arrests have also been very difficult for the cops to arrange, likely because of lawsuit implications, the experience of the DNC's mass arrest, and the ferocity and militancy of the demonstrators. Ignite! will be covering the march later this month with live updates on Twitter. Follow us @ignite denver.

A Chilean streetfighter takes aims at police with a slingshot

#### Chilean Revolt **Continues**, Black September in Full Swing

After a summer that has seen an intense climate of repression against a thriving insurrectionary anarchist movement and the murders of two young demonstrators during general strike uprisings, Chile was set to see a lot of action during the 38th annual demonstrations commemorating the U.S.backed coup that led to a brutal military dictatorship in the early 70's.

The September 11th demonstrations saw attacks on police and a media widely seen as a pawn for the government as well as widespread property destruction and the erection of burning barricades. Many of Chile's largest cities were affected, and anarchists demonstrated that despite recent setbacks, the revolt and stuggle will not stop.

#### Longshoremen Storm Port in WA, Fuck Shit Up!

More than 500 Longshoremen from the Internation Longshore and Warehouse Union upset over a multinational corporation's scab hiring practices stormed a grain terminal in Washington after months of tensions. simmering

Workers armed with baseball bats and crowbars smashed out the windows of the facility's guard station, causing the guards to cower for six hours, not kidnapped or taken hostage as earlier corporate media reports led people to believe. Other workers are accused of cutting brakelines on box cars and dumping grain, as well as stealing the guards' patrol car and crashing it into a ditch. Most of the contingent physically blocked the railway, and the next day ports up and down the west coast were shut down in solidarity. The first responding police officers to the occupation were threatened with bats and forced to leave.

Local anarchists looking to express solidarity hung banners in Olympia expressing support while others sought out the workers in order to plug into the struggle. A writeup entitled "We just did it together and it was powerful, you know?" was posted to the internet.

# Mainstream Media Mayblems

They will tell you of someone whom they can paint as a terrorist, easily, but when that person is let off because of the stupidity of police, do they run the real story? That they were charged completely falsely, that they spent 38 days in solitary, missed a 21st birthday for trumped up charges? Do they tell you that this person was offered a plea deal the night before this trial, that if it had been taken they would have been able to control this person's life for upwards of two years, that they actually only offered it because they knew they had no evidence? And how does this speak to the way that our system reaps monetary value through fear and coercion that they create? How many have pled guilty to something that they didn't do because of the pressure brought on by the system to take their fucking deals? Sitting in court, we hear the judge ask if the person in front of them is being pressured in any way, by a judge who is sitting on some bench above, holding onto the power of whether this person can walk down the street or not. And how they are allowed to do so; ankle monitor or not. Threaten them with when they will be allowed to see their family again.

Ten years of possible prison time taken off the table if only they had plead guilty to them the night before through a call with a lawyer. They did not, and were fortunate to escape a trap that this system creates for all of us, in this capitol based off of monetary value, we must learn to stand our ground against them. Any deal that they offer you is still the highest form of abuse; any way out that they give is still giving them money. We must fight them, on every front; we must not plead guilty when there never was guilt to start. They threaten us with our lives if we do not take their outs; they are a gang, a powerful one, no doubt, but they can be beaten; with every one of us that refuses to let them bully us into admittance of something that we did not do. I know; they threaten to take your life away, but if we stand up and refuse to let them, we are causing damage. Even in the cost of a trial; because we know their allegiance lies solely in monetary value, this is their weak spot, and where we can hit them hardest. Most cases would be dropped if everyone started doing that; they would be even more bankrupt than they are already becoming. We must stand up for ourselves against the atrocity of violence that they instigate against us on a daily basis. Not just that of physical violence, but that perpetuated on us in their threatening. We are not afraid; and even if we are, we must stand with shaking legs.

Feedback & Comments We Found "haven't lived there in a while, but glad to see this, wish it were happening here."

we are learning :) thanks! - ignite! on (A) News "is this the year of the periodical?" says one anon. "No, they're just finally catching on. As they should." says another anon. - (A) News

"Hey could you send an issue to us at the red pill every issue and we'll make a bunch of copies and distro here in GJ. And probably submit some content every issue." - J.R on our blog

Yo Red Pill we'd love to but your website expired! Hit us up with a mailing address and we might be able to figure something out! - ignite!

## support and sustain

If you're supportive of the project and want to help us offset costs, local radical distro P&L Press has generously set up a subscription service you can sign up for online, as well as order single issues. This helps us sustain our writers and editors, makes it easier to print more issues, and mail out as many as people want. We're interested in a free-to-prisoners program but presently don't have the financing for a mailing that large. Visit plpress.bigcartel.com to order subscriptions and back issues. Remember, if you get a copy from us at a show or somewhere else around town, you can give us a donation and we'll probably click our heels!

# IGNITE! OP/EDS For An Unwavering, Nationwide **Solidarity Effort Supporting the CA Hunger Strikers**

by Ignite! Collective

Prisoners in California are presently waging the largest hunger strike in state history. More than 12,000 have joined, with prisoners across the country fasting in solidarity. In California, support organizations have made a specific call for CA anarchists to engage in direct action towards the prison system in an effort to raise awareness.

Ignite! feels that anarchists and allies acrosss the world should be involving themselves in organizing work that immediately confronts this issue. Comrades in prisons both in Chiapas and Palestine have begun hunger strikes of their own.

A hunger strike is one of the most harrowing methods of nonviolent protest. Being as this is the second round of hunger strikes stemming from demands issued by a council of representatives in Pelican Bay's Secure Houing Unit this year, the authorities have been much more brutal this time around. They have denied the entrance of lawyers advising the strikers, completely cut visits for family members, and denied any liquids for the strikers. Many of them are still in poor health from the strike in July. Strikers in the Calipatria facility have been passing out. Many strikers vow to die Hunger strike supporters marching through the park in front of the on strike if their demands, a simple list of basic reforms like a better diet and revisions of the gang association policies, aren't met.
